

SR 14 and Dog Mountain Trailhead Congestion and Safety Plan

How can we make sites in the Gorge safer to access?

- The Columbia River Gorge National Scenic Area (CRGNSA) attracts many visitors due to its abundant recreation sites and other destinations.
- As more people use SR 14 to access places like Dog Mountain Trailhead, congestion increases.
- Help us identify opportunities to manage congestion and promote safe access to popular sites in the Gorge by visiting our online open house.
